

Marine Corps Logistics Command

Marine Corps Operation Enduring Freedom Reset

Purpose and Agenda

Purpose

Provide an overview of MCLC's Operation Enduring Freedom (OEF) Reset support and current operations.

Agenda

- Institutional Guidance
- Reset Definition
- Reset Support
- Current Status

Institutional Guidance

Operation Enduring Freedom Ground Equipment Reset Strategy

1 JAN 2012

MESSAGE FROM THE COMMANDANT OF THE MARINE CORPS

America's Expeditionary Force in Readiness, the Marine Corps must be ready to respond to any crisis, living true to our "First to Fight" ethos, cannot afford to become complacent in the face of emerging threats around the world. The Marine Corps is a middleweight force; this title calls a high state of readiness and the ability to seize upon opportunity. As such, we must swiftly repair what is broken, and also disengage ourselves of what is obsolete. Placing the right equipment, the proper condition, at the right cost, into the hands of the war fighter vital to this effort. This comprehensive ground equipment reset strategy will provide Service level common operating picture. It will unify us towards planning for and execution of our equipment repair and return to the cal force.

stained combat operations in Iraq and Afghanistan over the past decade we placed an unprecedented demand on our equipment. The elevated operating and service life of our ground equipment resulting from these harsh environments, has far exceeded normal peacetime usage rates. Many items have been destroyed or damaged beyond repair. We must align our force structure requirements, acquisition plans and maintenance strategies to our reset requirements to ensure the sustainability of our force. We also must conduct this reset in stride because our Corps continues to be forward deployed and forward engaged in response to foreseen threats as well as the many ongoing Combatant Commander requirements.

is OEF Ground Equipment Reset Strategy charts the way forward. It will aide in the planning and execution of logistics tasks needed to restore our combat capability. I require the personal commitment of every Marine to ensure our equipment is repaired and returned quickly to the war fighter. Setting our Corps for the future remains my top logistics priority.

General F. Amos
Commandant
General, U.S. Marine Corps

Reset Defined

Actions taken to restore unit equipment to a desired level of combat capability commensurate with the unit's future mission.

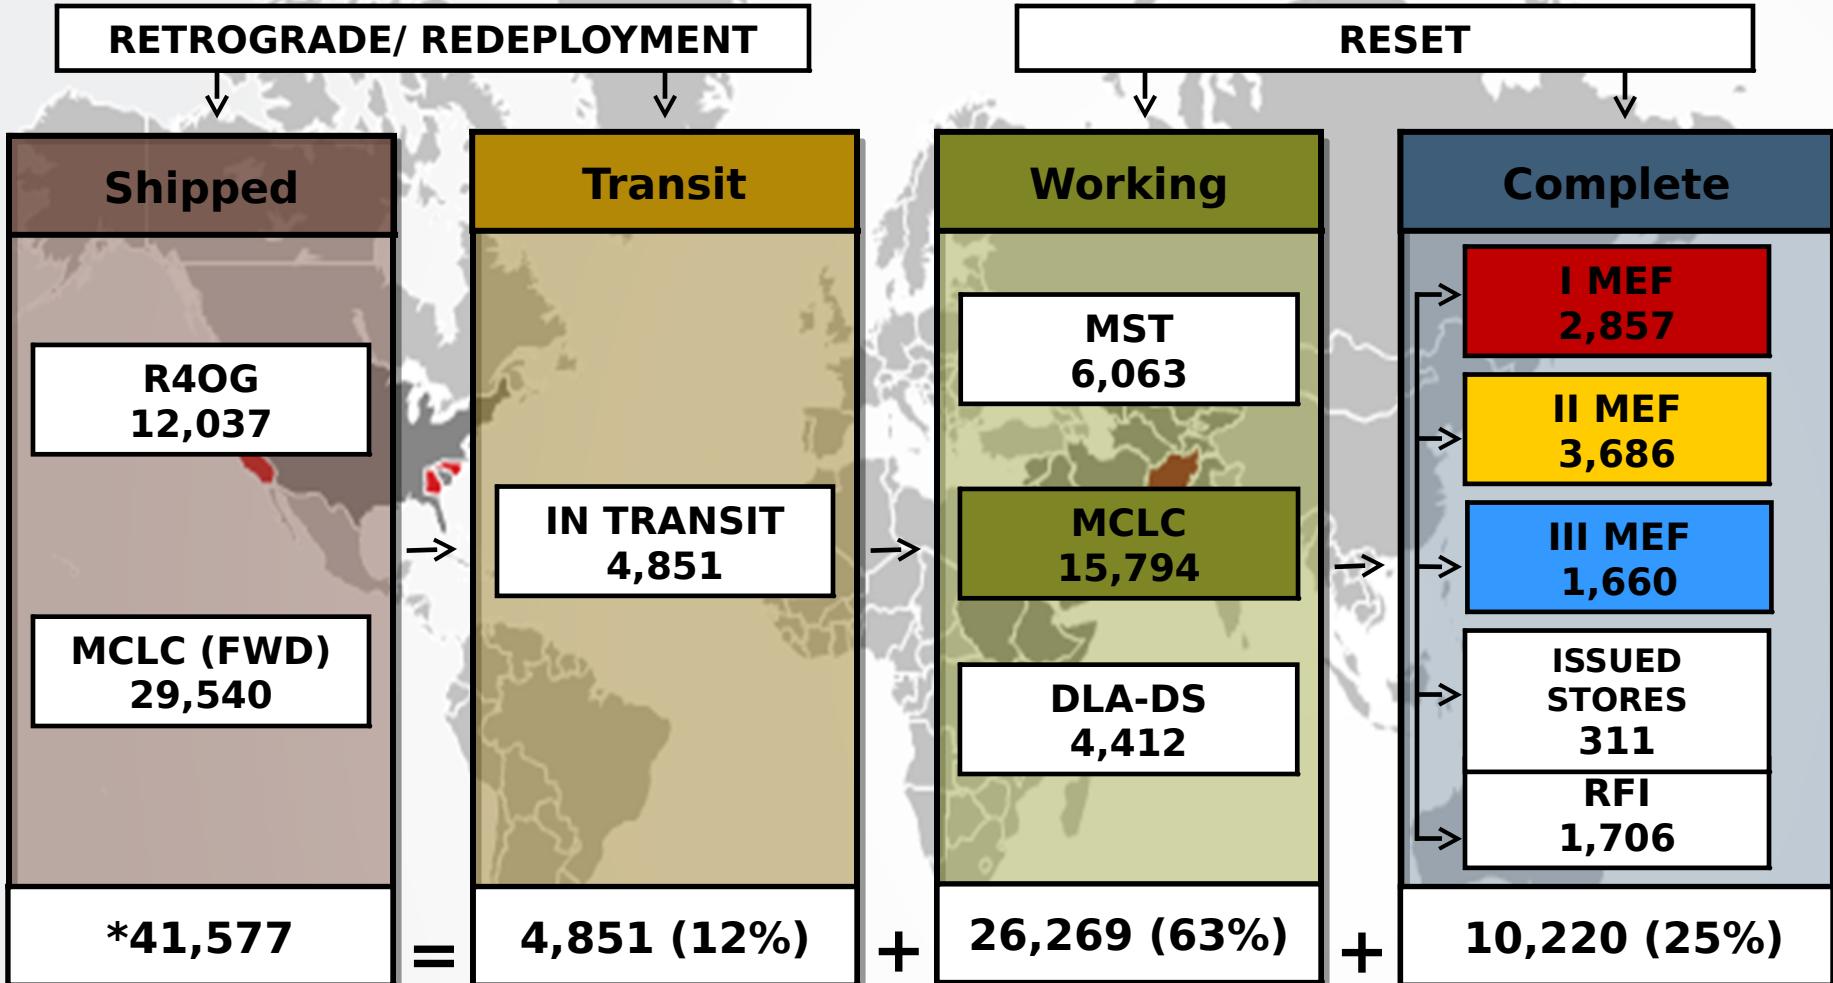

There are three components to reset:

- **Repair** – The restoration of an item to serviceable condition through correction of a specific failure or unserviceable condition.
- **Recapitalization** – Extending the equipment's useful life by returning it to near zero mile/zero hour condition with either original performance specifications or upgraded performance specifications.
- **Replacement** – Acquisition of new equipment to replace battle losses, washouts, obsolete equipment, and equipment deployed and left in theater but needed for critical missions.
